Introduction

This document presents the different user experiences that need to be added to ICNML with their order of priority. 1 being the highest priority, 7 being the lowest. It will be used as a guideline to implement features and create the planning.

Features and Priorities

Priority	Feature
1	Add a delete action button on the Trainer folder
2	Add a delete action button on the images in a Trainer folder
3	When searching as a Trainer, allow filtering by donor (username)
4	Add the openLQM quality detection algorithm on traces and sort by quality the traces
5	Add a toggable superposition of the quality heatmap produced by the algo on the traces
6	Add the capacity for a Trainer to choose amongst existing exemplars for a single trace
7	Add for the Admin a table with all users + capacity for an admin to remove a user

Table 1: Features with their associated priority

Examples

Here's a few mockups for how the feature will be implemented. Style is not the focus but functionality.

Marks					
3	Rename	Show	Users	Download	Delete
10	Rename	Show	Users	Download	Delete
9	Rename	Show	Users	Download	Delete

Figure 1: Add a button to delete a folder

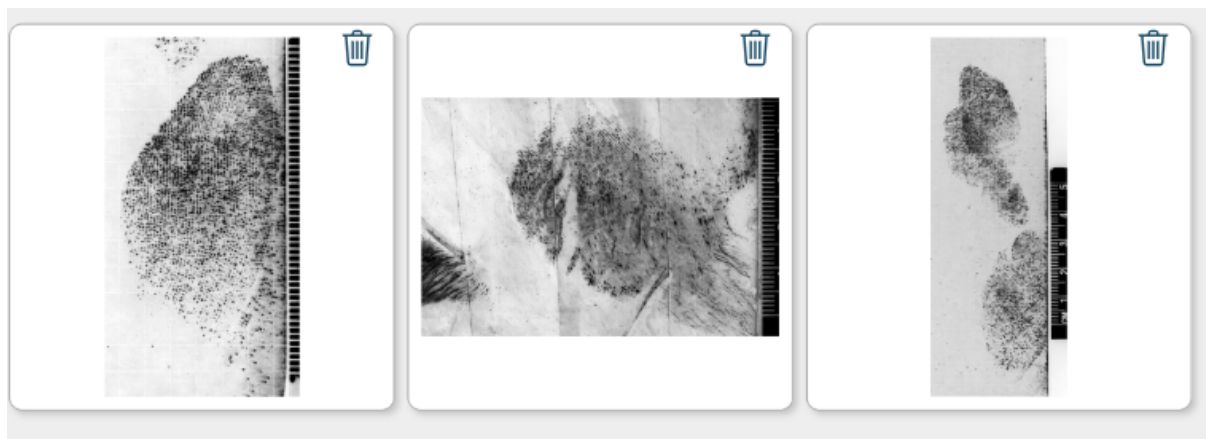

Figure 2: Add a button to delete an image from a folder

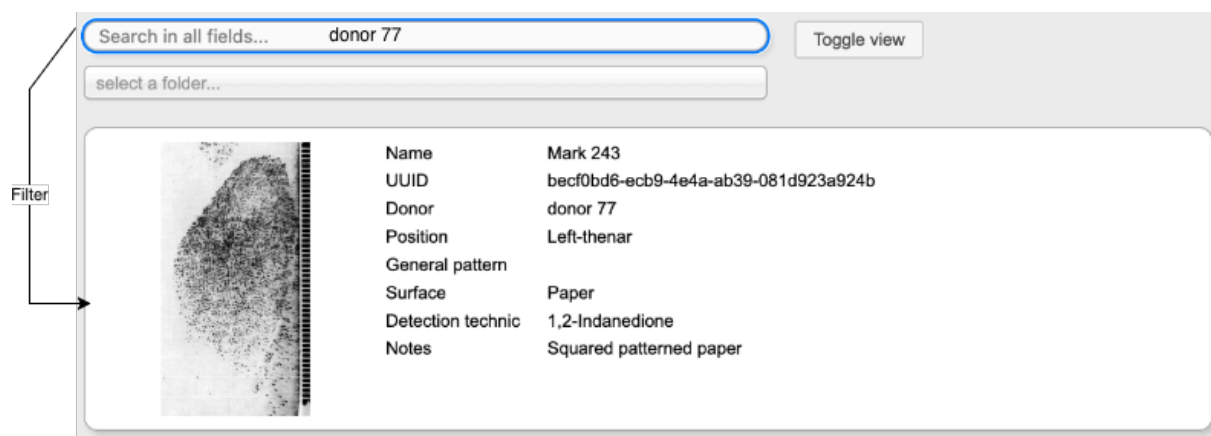

Figure 3: Search traces by donor

Figure 4: Add button to change exemplar for a mark
